

Ardarys

AI-powered legal decision platform, improving the quality of legal outcomes through structured workflows, expert input, and AI assistance.

The Problem with Conventional Legal Services

Slow & Expensive

Legal services are opaque, costly, and often delayed.

No Validation

Users rely on a single lawyer with no comparison or quality check.

High Risk

Biased or incomplete advice leads to costly mistakes and delays.

The Solution

Ardarys combines four powerful elements into one intelligent platform:

1

Structured Case Workflows

Consistent, repeatable processes for every legal matter.

2

AI-Assisted Legal Research

Fast, accurate knowledge retrieval for lawyers.

3

Multi-Lawyer Input

Multiple expert perspectives, not just one opinion.

4

Performance-Based Ranking

Quality scoring system that improves over time.

Why Now

Digital Shift

Legal services are rapidly moving online. AI now enables scalable legal knowledge processing, ranking, and automation.

Armenia tailwinds

Armenia is rapidly expanding its tech ecosystem, supported by strong digital transformation initiatives, growing SMEs, and increasing adoption of AI in professional services.

First-Moment Opportunity

First time it's possible to structure and rank expert legal input at scale. The infrastructure for scalable legal intelligence now exists.

Product

Case Management

End-to-end case management system for users.

AI Assistant

AI-powered research tool for faster, better lawyer responses.

Virtual Secretary

Automated scheduling and communication management.

Multi-Lawyer Q&A

Users get input from multiple verified legal experts.

Scoring System

Quality and accountability scoring for lawyers and outcomes.

Traction

Verified Lawyers

Active on the platform

Users

Real legal interactions

Early Signals

Early campaigns showed strong engagement via free-service and scoring incentives. New version of the platform already rebuilt.

Market Opportunity – Armenia

Why Armenia First

Armenia is a concentrated legal market with low digital legal penetration. Even capturing **5–10% digitalization** of legal workflows equals a **\$5M–\$30M annual opportunity**.

Business Model

B2B – Lawyers (SaaS)

\$10–\$60/month per lawyer. Includes AI tools, client acquisition, visibility & analytics.

300 lawyers → **\$36K–\$216K** annual revenue potential.

B2C – Users (Paid Services)

\$10–\$100 per consultation/case service. Premium structured legal handling for SMEs & individuals.

1,000 users, 10–15% monthly engagement → **\$1K–\$10K/month** early-stage.

Future Revenue

Transaction fees on legal cases (**5–10%**) and SME/legal firm enterprise contracts.

Go-To-Market & Competition

Go-To-Market

- SEO-driven organic acquisition
- Lawyer partnerships
- Performance-based campaigns: free user services + lawyer scoring incentives

📌 **Key Insight:** Growth loop reinforces the product scoring system.

Competitive Positioning

Legal Directories

Discovery only — no decision support.

On-Demand Legal

Single-lawyer model — no validation.

AI Tools

Automation without expert validation.

Ardarys: Decision intelligence layer — AI + expert validation + scoring.

Core Insight & Moat

Legal services are not an access problem — they are a **decision quality problem**.

Structured Workflows

Improve consistency across every case.

AI Speed

Improves knowledge access and response time.

Scoring System

Quality improves as more lawyers and users participate.

The moat: The system gets better as more lawyers and users participate — a self-reinforcing flywheel of quality and trust.

The Road Ahead

Scale Team

Expand our engineering and legal expert network to support product development and user growth.

Enhance Product

Integrate advanced AI capabilities and analytics features for deeper legal insights and efficiency.

Market Expansion

Strategically explore new geographies, beginning with key markets in Eastern Europe.

Secure Funding

Actively seeking seed investment to accelerate our platform's development and market penetration.
